Office of River Protection  
United States Department of Energy  
P.O. Box 450, MSIN: H6-60  
Richland, Washington 99352

Re: Amendment to *Notice of Construction (NOC) Approval for the Bulk Vitrification Test and Demonstration Facility and Partial Retrieval of Tank 241-S-109*, Order DE04NWP-002

Dear Mr. Schepens:

This letter transmits an amendment to Order DE04NWP-002. During a recent review of permits within the Hanford Air Operating Permit (No. 00-05-06), a typographical error in the boiler operation emissions control condition of the Order was identified. The stated period of assessment was incorrect.

The following Order amendment change is ordered as Order No. **DE04NWP-002, Amendment 1:**

**Change 1:** Revise Emission Control Approval Condition as:

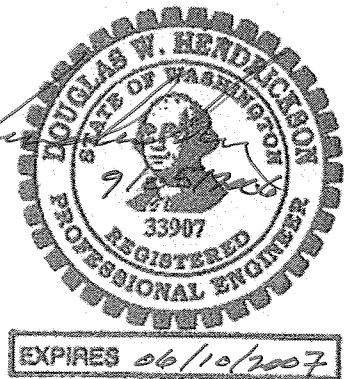

- 2.9 The diesel-fired boiler shall not operate for more than 7,008 hours per year on a 12-month rolling summation calculated once per month. Compliance shall be monitored by installing and operating a non-resettable totalizer on the boiler.

This amendment to the Order may be appealed. Appeal procedures are described in the original Order. If you have any questions concerning this, please contact Doug Hendrickson at 372-7983.

Sincerely,

Jane A. Hedges  
Program Manager  
Nuclear Waste Program

Doug Hendrickson, P.E.  
Lead Air Engineer  
Nuclear Waste Program
